

## **ADDITIONAL LINES FOR INCLUSION IN THE RUSSIAN THOROUGHBRED STUD BOOK**

Detailed below are two lists of horses which are put forward for ratification by ISBC Members to be included within the Russian Thoroughbred Stud Book. The respective evidence of authenticity is appended.

**List A** comprises horses which have had their pedigrees checked and verified by the designated Reviewer of the Russian Stud Book, Dr. Hubert Uphaus, alongside the Consultant Keeper of the Russian Stud Book, Dr. Orudzh Suleymanov. For all listed horses extended pedigrees with verifiable foaling references are attached, tracing along all lines of pedigree to horses which are themselves designated as Thoroughbred. Pedigree problems have not been determined.

**List B** comprises a line for which the following pedigree problems have been revealed:

The broodmare MILYA (SU) does trace back in her distaff line to a mare named GRENZBURG, which is a typical World War II case. She is born in an area which belonged to Poland, but which was occupied by the Nazis at that time (so called Warthegau). There has no official foaling reference been published, neither in the German nor in the Polish Stud Book. However, the birth of GRENZBURG is recorded in the German "Warthegau Liste" (Attachment 1), which is a comprehensive handwritten listing of foals born in the Warthegau region in the years 1940 to 1943. GRENZBURG raced in Austria (4 starts in 1942, 17 starts in 1943, 12 starts in 1944) and then was confiscated by the Russians. A copy of the respective covering reference (Attachment 2) is attached.

GAVERNESSE (RU), the third dam of GRENZBURG, was born in Russia in 1916. However, there is no foaling reference published in the Tsarist Stud Book, which is the case for several other broodmares having been accepted retrospectively as Thoroughbreds by ISBC during the past years. The respective covering reference is attached (Attachment 3).
